

# Garden Island Orchid Society Newsletter

November - December 2020

## President's Message

Aloha and Happy Holidays to all!

It will be a subdued celebration here at my house with the small group of folks who are in my safe Covid 19 pod. I will miss the burst of blooming orchids that usually are in the house after our Christmas party, but we will definitely be celebrating everyone's health and happiness. I am feeling safe here on Kauai and looking

forward to 2021 when the roll out of the vaccine occurs and we are able to meet again. This will take time, so your GIOS Board is planning on Zoom meetings for our 2021 General meetings. We will work on providing interesting content and some of our favorite speakers. We will schedule these on the same dates that we would have been regularly attending (the second Friday of February, April, June, August, October, and the first Saturday in December). If we are able to actually meet in person towards the end of 2021 that will be wonderful.

If you haven't Zoomed yet, don't worry. In the newsletter prior to the February meeting we will include instructions and helpful hints. We will also provide information on 2021 dues, which the Board will adjust based on the current environment.

I hope you have enjoyed our 2020 Newsletters and the pictures of members' blooming orchids. Continuing with that theme, here are some blooming Cattleyas from my garden. I want to take the time to thank our Newsletter Chair, David Fastenau, for doing a great job keeping us connected.

Hopefully we'll see each other in person soon,

Elizabeth

# Sharing Our Orchids Through Photos

Featuring blooms and photos taken  
by Dennis Olivas

*C. purpurata* 'Vicenta Olivas'

*Laelia purpurata*, now known as *Cattleya purpurata* and the closely related species including *tenebrosa*, *crispa* and *lobata* are Dennis Olivas' favorite in the *Cattleya* alliance.

*C. purpurata* originated in the Brazilian states of Rio Grande do Sul, Santa Catarina and São Paulo. They are temperature tolerant and bloom in the late spring throughout summer in Dennis' unheated greenhouse in Daly City California. They require lots of good watering and fertilizing during the growing season. They get transplanted after the blossoms are spent, in a media mixture of 3 parts *Orchiata super* and 1 part #4 (coarse) perlite. Dennis prefers plastic pots.
